Electrical Systems

Seminar No. 263A

Advanced Training – LV7000

Course Description:

Customer-specific, interactive training with hands-on exercises focused on software installation and fault diagnosis. At the end of the course, participants will be able to:

- Install and configure application software, and apply specific parameter settings
- Utilize advanced diagnostic tools
- The training will take place at customer site

Learning Outcomes:

Advanced knowledge of the LV7000 converter and advanced fault management capabilities

Prerequisites:

Training courses 261 or 262: LV7000 Standard Software or LV7000 Processing Lines

Participants:

Commissioning technicians and service personnel

Duration:

2 days
