Rotating Machines

## Seminar No. 720 Synchronous Motors

### Course Description:

During this course, participants will learn about the different types and uses of synchronous motors, start-up inductive mode, rotor power, different types of rotors, and exciter use.

### Learning Outcomes:

Basic knowledge of the function of synchronous motors

### Prerequisites:

Fundamental knowledge in electrical engineering

### Participants:

Project managers, buyers, commissioning, operation and maintenance engineers

### Duration:

1 day

442 rue de la la Rompure
