Executive Overview

M110 Dynamic Positioning and Automation Executive Overview – Systems

Course Description:

An overview course considering the basic technical principles of Dynamic Positioning and Marine Automation systems, with a focus on the architecture and the hardware used to implement such systems.

The course can be combined with M111 Executive Overview (functions) to give a fuller understanding of the operational aspects of the system.

Learning Outcomes:

To gain an overview of the technical principles of Dynamic Positioning (DP) and Vessel Automation.

Prerequisites:

Staff attending should be familiar with vessel operational procedures.

Participants:

Vessel managers, superintendents, office-based staff, project staff.

Duration:

1 day
