

Energizing People > Powering the Future

Electrical Systems

Seminar No. 275A

Advanced Training – LV5 (ProSolar)

Course Description:

Highly interactive training with hands-on exercises focusing on fault diagnosis and troubleshooting. At the end of the course, participants will be able to:

- Explain the hardware components in detail
- Perform advanced programming and installation tasks for the control components
- Create specific parameter settings according to customer and site requirements
- Conduct advanced troubleshooting

Learning Outcomes:

Advanced knowledge of the LV5 Solar converter and advanced troubleshooting capabilities

Prerequisites:

Training Course 275: LV5

Participants:

Commissioning technicians and service personnel

Duration:

2 days
