Generator Inspection Programs
Proactive Lifecycle Planning

It is important to schedule regular generator maintenance to ensure efficient operations are maintained. The frequency of maintenance should reflect the generator operating conditions; for example, dirty conditions on open ventilated machines will require more frequent inspections and cleaning than closed circuit machines in a clean environment. To ensure proactive lifecycle planning, GE Power Conversion offers a variety of cost-effective generator inspection programs. Our team of experts will provide you with an in-depth understanding of maintenance requirements, helping to avoid unplanned downtime so your equipment performs better, longer.

TAILORED TO YOUR NEEDS
Building on our field service team’s experience, we provide a selection of inspection programs tailored to suit your operating conditions.

GE’s thorough inspection programs are designed to provide early detection of developing issues throughout the generator lifetime - enabling avoidance of potential failures, preventing unplanned downtime. We provide inspection programs relative to the generator operating conditions helping to minimize the number and duration required.

EXPERT SUPPORT
GE, as an original equipment manufacturer (OEM), has extensive experience in maintaining a global installed base of rotating machines. Our team of field service support engineers are able to undertake inspections, troubleshoot and repair on site plus we can provide you access to engineers, tools and equipment at GE factories to repair or overhaul your equipment.

Our rotating machines service support is provided by the engineers who have designed the equipment, providing you with advice on the most appropriate OEM designed upgrades to manage obsolescence and maintain original equipment performance, and or add new functionality or controls.

SAFETY & TRAINING
GE is committed to ensuring the highest levels of safety for its employees and customers. We provide training for your maintenance teams, assisting to undertake inspections safely and competently.
