PEC(E) Control

M011 SD7000
Synchronous Inboard Motor

Course Description:
This Synchronous Inboard Motor course provides participants with an understanding of their Electrical Propulsion System (EPS) and the technology used on board. The course also covers system configuration and setup.

Learning Outcomes:
Course attendees will learn the fundamentals of electrical drive, control, automation, network, HMI, and motor operation.

Prerequisites:
Basic knowledge of electrical engineering and electronics; use of personal computer

Participants:
From junior to expert level

Duration:
3 days
