Electrical Systems

Seminar No. 275A
Advanced Training – LV5 (ProSolar)

Course Description:
Highly interactive training with hands-on exercises focusing on fault diagnosis and troubleshooting. At the end of the course, participants will be able to:
• Explain the hardware components in detail
• Perform advanced programming and installation tasks for the control components
• Create specific parameter settings according to customer and site requirements
• Conduct advanced troubleshooting

Learning Outcomes:
Advanced knowledge of the LV5 Solar converter and advanced troubleshooting capabilities

Prerequisites:
Training Course 275: LV5

Participants:
Commissioning technicians and service personnel

Duration:
2 days
